## **S-10C mini oil press machine**

### **Method of operation about the oil mill:**

1. Connect the power, pressing the heating switch to wait around 10 minutes (this time, you can fry the raw materials), don't need to turn off the switch, it is automatic.
2. If you want to get the higher oil yield, it's better to fry raw materials firstly.
3. Clockwise rotation to turn until can't whirl any more, then do one revolution, you can according to the cake situation to adjust the hand wheel.
4. After finish pressing, need to press more 3-5 minutes, then press motor stop switch, press heating switch, and then pull the power switch.

### **Advantage about the small oil press machine**

1. Pure copper motor and high-quality reducer transfers more torque.
2. 20-280-degree centigrade adjustable heating system.
3. Adjustable extrusion clearance with easy operating wheel
4. Industrial heavy-duty universal wheel with brake is easy to move and fix

5. Comes with storage space for simple tools

6. Floor-standing body for easy operation, no need to bend over or rest on the table

### Technical data about the palm oil mill:

Model	S10C mini oil press machine
Capacity	9-15kg/h
Motor power	550w(220v/100-110v)
Heating power	630w
Oil residue in cake	less than 1%
Size	645x295x735mm
Package Size	580x345x660mm
Net weight	34/40kg
